The Council’s adopted Core Strategy includes a commitment to identify sites to meet demand for Gypsy and Traveller pitches in Plymouth (Policy CS17). Additionally, the Council has a statutory responsibility to make provision to meet such demand.

This report seeks the Cabinet’s approval for a consultation document, to seek the views of local communities and stakeholders on a range of possible Gypsy and Traveller sites in Plymouth. The outcome of this consultation will be fed into the process of preparing the Sustainable Neighbourhoods Development Plan Document (DPD), and other Local Development Framework (LDF) documents as appropriate.

Corporate Plan 2008-2011:

The report supports the delivery of Corporate Improvement Priority (CIP) 4 ‘Narrowing the gaps between communities’; CIP5 ‘New, affordable and decent housing’; and CIP12, ‘Accelerating Sustainable Economic and Housing Growth’. It will do this by helping to meet the housing needs of a particular sector of the community, within the context of the City’s overall spatial planning vision and strategy.

Implications for Medium Term Financial Plan and Resource Implications:
Including finance, human, IT and land

This consultation process is estimated to cost in the region of £3,000. This will cover publication and publicity costs. It will be met from the existing Spatial Planning budget.

The work will be instrumental in trying to secure government grants to provide Gypsy and Traveller pitches, which will represent an income to the authority, and potential savings in terms of the reduction in costs of dealing with unauthorised encampments.
Other Implications: e.g. Section 17 Community Safety, Health and Safety, Risk Management, Equalities Impact Assessment, etc.

The consultation process forms a part of the Local Development Framework programme, which directly supports the promotion of community safety through the provision of policies to influence the design and nature of physical development. Equality impact assessments are undertaken for each LDF document.

The LDF is a critical policy framework for managing main risks associated with Risk 51 on the Council’s Strategic Risk Register: ‘Failure to deliver sustained and accelerated economic and population growth.’ A prioritised LDF programme, focussed on the delivery of the growth agenda, is identified as one of the existing control measures.

Recommendations & Reasons for recommended action:

It is recommended that the Cabinet:

1. Approve for consultation purposes the Gypsy and Traveller sites Consultation Document.

   **Reason**: To enable the Council to meet its statutory requirements, and to comply with Core Strategy Policy CS17 relating to provision of adequate sites for Gypsies and Travellers.

2. Delegate authority to the Assistant Director of Development (Planning Services) to agree the final publication of the Consultation Document, subject to any significant changes to the content of the report being agreed with the Portfolio Holder for Planning and Regeneration and Economic Growth.

   **Reason**: To enable the Council to progress the consultation in line with targets in the Local Development Scheme

Alternative options considered and reasons for recommended action:

The alternatives would be:
- Not to publish the consultation document. This would fail to address the requirements detailed in this report.
- Include sites which have been rejected from this consultation. The reasons for not including these sites are shown in the annex to the consultation document.

1. BACKGROUND

1.1. There is a statutory requirement for local authorities to make provision in their Local Development Framework (LDF) to meet the accommodation needs of the Gypsy and Traveller communities.

1.2. The Government believes that everyone has the right to a decent home, and has made it clear that this applies to the Gypsy and Traveller communities. In order to properly assess the need, a countywide survey was undertaken in 2006. This was used to inform the Regional Spatial Strategy (RSS), which in turn set out the pitch provision for each local authority.

1.3. The RSS Examination in Public into proposals for Gypsy and Traveller pitch provision was held in March 2008. The Secretary of State’s proposed changes were published in July 2008. In these, Plymouth is required to find an additional 40 residential pitches and 15 transit pitches.

1.4. Suitable sites for all forms of development, which will include Gypsy and Traveller sites, will be identified in the Sustainable Neighbourhoods (Key Site Allocations) Development Plan Document (DPD). This will be the subject of consultation in the summer of 2009.

1.5. However, there is a pressing need to consult now on a range of options for Gypsy and Traveller sites. This is important because of: the pressing need to deliver at least one site; the current availability of Government grants to facilitate delivery; and the need for a clear evidence base for the eventual site allocations in the DPD.

2. WORK UNDERTAKEN TO DATE

2.1. The Council has been looking for suitable Gypsy and Traveller sites for a number of years, and is committed to increasing provision, not only in response to national and regional policy, but also through its own adopted policies, and emerging proposals.

2.2. The Adopted LDF Core Strategy recognises the requirement to find additional sites. Strategic Objective 10 of the Core Strategy seeks to ensure that ‘everyone has access to a safe and decent home’. It states that this will be achieved, in part, through ‘providing decent and appropriate sites for Gypsy and Traveller accommodation.’

2.3. Policy CS17 of the Core Strategy sets out the number of pitches that we are required to find, along with the criteria against which site suitability will be considered.

2.4. Since the adoption of the Core Strategy, we have prepared Sustainable Neighbourhood Assessments for each neighbourhood in Plymouth. In undertaking this work, we have sought to identify potential Gypsy and Traveller sites through our discussions with local communities and through an assessment of where unauthorised encampments have taken place in the past.

2.5. A call for suitable sites was made by the Council’s Social Inclusion Unit in December 2007. At the same time, it was announced that 2 council owned sites, one at Military Road, Efford, and another at Goodwin Park in Southway, were under consideration and
public comments were invited. Following this exercise, the Southway site was dropped, due to its unsuitable location, leaving the Efford site for early consideration.

2.6. A separate report to Cabinet recommends that consideration now be given to working up a grant submission to deliver a residential gypsy site at Military Road. This site has already been subject to public consultation, and further representations may be made as part of the normal planning application process. However, to meet the need identified, there will still be a requirement for other sites to be considered, and it is the purpose of the currently proposed consultation to seek views on additional sites.

2.7. In addition to the December 2007 consultation, publicity on issues surrounding Gypsy and Traveller pitches was provided as part of the Your Place Your Future programme of LDF consultations, the LDF Big Picture event in July 2008, and at the Respect Festival in October 2008. Discussions have also started with the Gypsy and Traveller community.

2.8. Through these processes, a number of potential locations have been identified and, where appropriate, subject to further assessment. The criteria against which sites are assessed have been guided by the advice contained in Government publications, including Circular 01/2006.

2.9. Due to the constraints of an urban environment, it is unlikely that any site will be meet all of the recommended criteria, but this should not in itself exclude sites from consideration. Some difficult decisions will have to be made in balancing all relevant factors to arrive at a number of preferred locations.

3. DRAFT CONSULTATION DOCUMENT

3.1. The consultation document attached in the Appendix to this report briefly sets out the policy background to site provision, the number and type of pitches required, and the sites that are considered most worthy of further consideration. These include:

- Coombe Farm, Mowhay Road
- Land at Imerys Works, Coypool

3.2. Additionally, the consultation provides an opportunity for alternative sites to be put forward for consideration.

3.3. Other sites that have been considered and rejected are shown in the schedule to the consultation document.

3.4. In addition to the obvious benefit to Gypsy and Traveller communities, the consultation document sets out the benefits to the wider community, such as:

- Reducing the number of unauthorised encampments.
- Reducing conflict between communities
- More effective enforcement action against unauthorised encampments.
- Financial savings to the Council in having to deal with fewer unauthorised sites.

3.5. If we act now, the Council can apply for government grants to meet the cost of site provision.
3.6. There are also consequences of failing to provide adequate sites. If sites are not allocated, the Sustainable Neighbourhood DPD could be found unsound, which would have consequences for future planning of the city. In addition, in the absence of an adopted planning framework, it would be difficult for the Council to resist inappropriate sites coming forward through the planning application process.

4. NEXT STEPS

4.1. The Gypsy and Traveller Sites Consultation Document will be subject to a six week period of consultation, from 6th February 2009 to 23rd March 2009. This will coincide with the Derriford & Seaton Area Action Plan consultation. Events are being planned across the city, and will be supported by Planning Aid.

4.2. Consultation will also take place with the Gypsy and Traveller community, including existing residents at The Ride, The Gypsy and Traveller Education Centre, and National Gypsy and Traveller networks.

4.3. The results of the consultation will enable us to better understand local issues and needs. It will allow any additional issues and sites that may come forward as a result of this exercise to feed into further consultation on the Sustainable Neighbourhoods DPD, which is planned for late summer 2009.
APPENDIX
DRAFT CONSULTATION DOCUMENT

Help to plan for Gypsy and Traveller sites.

1. The Local Development Framework

1.1 The City Council is producing a Sustainable Neighbourhoods Development Planning Document (SNDPD), which will set out site-specific proposals for different parts of Plymouth. The SNDPD is one of a number of documents that together are known as the Local Development Framework (LDF). This Sustainable Neighbourhoods plan will set out what should happen over the next 15 years in those parts of the city that are not covered by Area Action Plans (AAPs).

1.2 The SNDPD will be produced under revised legislation that came into force in June 2008. This requires local authorities to engage with stakeholders, the public, and other organisations as appropriate, in the formulation of LDF documents.

1.3 This consultation document identifies potential Gypsy and Traveller sites. It will feed into the city wide SNDPD, which will be the subject of further consultation in October 2009.

2. Why Plan for Gypsy and Traveller Sites?

2.1 The Government believes that everybody has the right to a decent home, and that Gypsy and Traveller communities should have the same rights and responsibility as every other citizen.

2.2 Previous Government measures to deliver an adequate number of sites failed, and that is why the Government introduced new legislation in 2004 by which every local authority has to identify sufficient land for Gypsy and Traveller sites. The main reasons for this approach are;

- To create and support sustainable, respectful and inclusive communities where Gypsies and Travellers have fair access to suitable accommodation, education, health and welfare provision.
- To reduce the number of unauthorised encampments to reduce conflict, and to make enforcement more effective.
- To address under provision by significantly increasing the number of sites by 2011.
- To respect the traditional travelling way of life, whilst respecting the interests of the settled community.
- To ensure that local authorities’ plans include fair, realistic and inclusive policies to meet identified need fairly and effectively.
- To avoid Gypsies and Travellers becoming homeless through eviction from unauthorised sites without an alternative to move to.

1 The Housing Act 2004, and Circular 01/2006
3. How many pitches do we need?

3.1 The Regional Spatial Strategy (RSS) is the strategic plan for the South West. The RSS has been through a public examination, and the Secretary of State has determined the level provision to be made at the local level for Gypsies and Travellers. In Plymouth’s case, the guidance is supported by the Devon wide Gypsy and Traveller Housing Needs Assessment 2006. The numbers of pitches that Plymouth should find arising from the study, and as agreed by the Secretary of State, is an additional 40 residential pitches and 15 transit pitches.

4. Why provide pitches?

4.1 We have a statutory duty to make provision for sites to meet this demand. It is clearly an issue that must be addressed as a priority. Unless action is taken now the situation will only get worse, which will lead to more unauthorised sites, and the possibility of tension in the community.

4.2 The City Council has one permanent residential Gypsy site at The Ride, adjacent to the River Plym. This site has 13 pitches and a waiting list of 8. Clearly, this is not sufficient to meet the needs of the Gypsy and Traveller communities. There are currently no transit pitches in the city, and as a result Plymouth has about 20 unauthorised encampments every year, each which costs the Council an average of £6,500. These often cause social tensions, complaints, and serious problems for residents and Gypsies / Travellers alike. It is more difficult to require travelling people to move from an unauthorised encampment when there are not enough authorised sites in the area.

4.3 Also, whilst there is a shortage of authorised sites, there is a real risk that Government Planning Inspectors could allow unauthorised sites to remain in place, even if planning permission is refused by the Council. The Council wants to ensure that Traveller sites are located in the most appropriate locations, which is why we are carrying out this consultation to identify where they might be.

4.4 The chart below demonstrates the benefits of better site provision

- More trust in Local authorities to deal with problem
- More effective enforcement against unauthorised camps
- Less need for enforcement
- Unauthorised camping reduces
- More well managed sites provided
- Communities see benefit of site provision and more accepting of new sites
- Local authorities are more prepared to promote and provide new sites
5. What types of sites do we need?

Residential pitches. (40 pitches)

5.1 Residential, or permanent sites, have permanent structures which individuals, or families have a licence to live at. The sites generally have a brick built toilet and kitchen area, with residents living in mobile homes and keeping additional smaller caravans to travel in. There is also usually a storage area to keep materials and working vehicles etc. The site is then used as a base to travel from. Permanent sites are required as a base from which to send children to school, or because illness or old age prevents a more nomadic lifestyle. Permanent sites should not be located in areas where housing would not be permitted and should have a range of facilities on site, or within walking distance.

5.2 Residential sites can be publicly or privately owned. Where a pitch is leased, residents will need to pay rent. Council tax and utilities are paid on all sites in much the same way as for conventional housing.

Transit sites (15 pitches)

5.3 Transit sites are formal sites provided on a permanent basis. Priority should be given to the provision of this type of site, as it is in most urgent need. Transit sites are usually on land owned and managed by the Council, or by a Housing Association but can be privately owned. They have basic amenities such as hard standings, water supply, toilet and washing facilities, waste and electricity supply. Generally, Travellers can stay for a limited period (e.g. up to three months). The sites are open all year, but Travellers change regularly. Transit sites are closely managed, and again, residents are required to pay rent, council tax and utilities in much the same way as for conventional housing.

6. What have we done so far?

6.1 We have been looking for additional sites for a number of years. Clearly in a densely developed urban situation, it is not easy to find suitable additional provision. The Council is committed to increasing this provision, not only in response to National, and Regional Policy, but also in response to local need, and through its own adopted policies, and emerging proposals.

6.2 The Adopted LDF Core Strategy recognises the requirement to find additional sites. Strategic Objective 10 of the Core Strategy seeks to ensure that ‘everyone has access to a safe and decent home’. Amongst other factors, Point 5 of this Objective states that this will be achieved through ‘providing decent and appropriate sites for Gypsy and Traveller accommodation.’ Two sites have already been the subject of assessments and public consultation. A site at Southway has been dropped from consideration. However, a site at Military Road, Efford, which was previously used as a Gypsy site, is being progressed. This site alone, however, will not meet the identified need for pitches.

6.3 Policy CS17 of the Core Strategy sets out the number of pitches that we are required to find, along with the criteria against which site suitability will be considered.
6.4 Since the adoption of the Core Strategy, we have prepared Sustainable Neighbourhood Assessments for each neighbourhood in Plymouth. In undertaking this work, we have sought to identify potential Gypsy and Traveller sites through our discussions with local communities and through an assessment of possible locations, including those where unauthorised encampments have taken place in the past.

6.5 A call for suitable sites was made by the Council’s Social Inclusion Unit in December 2007. Consultation has taken place through the Your Place Your Future programme of LDF consultations during 2007 and 2008. Additionally, publicity was undertaken at the LDF Big Picture event in July 2008, and at the Respect Festival in October 2008. Discussions have also started with the local Gypsy and Traveller community.

6.6 Through these processes, a number of potential locations have been identified, and where appropriate have been the subject of further assessment. The criteria against which sites are assessed has been informed by the advice contained in government publications, including Circular 01/2006. Due to the constraints of an urban environment, it is unlikely that any site will be perfect, but this should not preclude sites from being brought forward for detailed consideration. Some difficult decisions will have to be made in balancing all relevant factors to arrive at a number of preferred locations.

6.7 A summary of alternative sites considered and rejected is included in the schedule.

6.8 The Gypsy and Travellers site assessments can be found under ‘Background Reports’ on the Council’s web site at www.plymouth.gov.uk/ldf

7. Potential sites

7.1 The following locations have been identified as being most worthy of further consideration for either permanent or transit sites, to meet the identified need. If these sites are confirmed as being acceptable in principle through this process, further detailed investigations will be undertaken to identify their specific potential, prior to their inclusion in the Sustainable Neighbourhoods DPD.

7.2 Additional details of the sites and a preliminary analysis of their potential are set out in the Gypsy and Traveller Sites evidence base reports.
Site 1 – Coombe Farm, Mowhay Road

7.3 This site was previously allocated for commercial development. Only a part of the larger site would be needed as part of any future development, and the location of pitches within the larger site will need to be determined as part of the overall development. It is close to the A38, and could be suitable for either a permanent or a transit site. The present access from the highway network would require improvement.
Site 2 - Imerys Works Coypool

7.4 This is a large china clay processing site to the north of the A38 at Coypool, which may become available for development during the Plan period. The site offers potential for a major mixed use regeneration, including a waste facility, employment, and residential uses – including a Gypsy and Traveller site. The location as shown is part of this larger site, which was identified in the Coypool Site, Key Constraints and Opportunities report, 2006. It is at the southern end of the potentially developable area because of the need for an acceptable environment and accessibility to local services. The precise location of the Gypsy and Traveller site would need to be determined as part of a plan for wider development of the Works. It could be suitable for either a permanent or a transit site.
8. Comments

8.1 We are looking for your comments on the sites currently under consideration, and any suggestions for alternative site locations that you may be aware of. You can contact us by the following means:

Contribute to the online discussion boards at www.plymouth.gov.uk/ldf
Write to us at Planning Services, Department of Development, Plymouth City Council, Plymouth PL1 2AA.
E-mail ldf@plymouth.gov.uk.

All comments should be received by the Council by 23rd March 2009

FAQs

Q Why do gypsies and travellers need permanent sites?

A - Although gypsies and travellers travel for some of the year, during the winter months most people need a place to stop. Travelling patterns are linked to the seasons and the work associated with the seasons. Gypsies and travellers do not travel on a daily basis all year round. Families require safe and secure places from which to do their travelling. The ‘base site (if they have one) will usually be where they can access GP’s, schools and a dentists etc. As gypsies and travellers grow older and become less able to travel on a regular basis, some require a safe and secure stopping place where they can maintain the cultural traditions of being a gypsy or traveller. Gypsies and travellers also sometimes stop travelling for periods of time to care for sick or elderly relatives or to continue a child’s education within a supportive school environment. Families will then take up the travelling way of life again following these critical events.

Q:- Why should we have to make special provision for Gypsy and Traveller sites?

A:- It is a legal requirement to allocate sufficient pitches to meet the identified need. If we do not do this through the LDF process, then our planning policy documents could be found unsound by a Planning Inspector, at significant cost and with adverse consequences for the future development of the city. If there is evidence of need that we do not address, the Secretary of State has power to make us find sites. If sites are not identified, it is likely that planning applications from individual gypsy or traveller will be submitted, and there is a greater likelihood that if refused planning permission, consent would be allowed on appeal.

Q: Is the lack of sites a problem?

A:- Gypsies and travellers have the poorest life chances of any other group in the UK, particularly in respect of health and education, and face widespread discrimination. Nationally, 21% of all gypsies and travellers living in caravans are homeless. The provision of sufficient authorised and well serviced sites for gypsies and travellers is crucial to supporting their long established way of life and in enabling them to have a recognised stake in society. It also lies at the heart of addressing the difficulties they face in accessing services, as well as reducing tensions with the local settled community and beginning to tackle ignorance and discrimination.
Q:- Who is going to pay?

A: There are two options;

1- Public provision
In recognition of the importance of the need to provide sites for gypsies and travellers, it is possible for the Council or a Housing Association to apply to Central Government for grants that cover 100% of the costs of new sites.

2- Private provision
The SNDPD could identify sites that could be purchased by individuals to meet their own family needs or to self manage.
## SCHEDULE OF OTHER SITES CONSIDERED

<table>
